FLOWCHART FOR EVENT REMINDER PAGE WITH SUBMIT/EDIT/DELETE FUNCTIONS

Bhety Penetzdorfer | 12. AUGUST 2021

Build the Front End of the Website → Used sublime for editing html, bootstrap and css

Set the connection to Mysql in PHP ← Build the table in Data using MySQL localhost

Define the Function for the Submit Button → - use the isset() function / - use sql INSERT INTO VALUES

-use the isset() function / -use SQL SELECT FROM ← -Define the function for retrieving data from SQL and displaying it to the browser

Add on php the edit delete button → use colspan for thead / add class button for the buttons

use SQL DELETE FROM WHERE setting up the success message after submission / -if i have extra time i would have put a confirmation pop-up before deleting the data ← Define function for the delete button

Define the function for edit button → -use SQL SELECT FROM WHERE to automatically fill the input field

-USE mysqli UPDATE SET WHERE or die ← Define the Update Button after edit
